

News Release

Keep a Competitive Edge with PBC Linear Commercial Rail

- **New Low Price!**
- **High Load Capacity**
- **Corrosion-Resistant Design**
- **Hard Anodized**

Rockford, IL – October 10, 2008 Save on costs with the newly *reduced-price* **PBC Linear Commercial Rail!** With new advancements made to our production process, costs on products such as **Commercial Rail** have been significantly reduced. This simple linear solution fits a number of applications at a very economical cost.

PBC Linear's recent addition of two Flexible Manufacturing Systems into their production line allows for 24/7 production. Time to manufacture and bottom-line costs have been dramatically reduced—allowing PBC Linear to lower their prices on their time tested linear motion products. **Commercial Rail** remains a proven technology in several industries, such as: automation, medical, packaging, and machine tool equipment.

Designed to handle tough applications at the lowest price, **Commercial Rail** carries a high load capacity and comes in steel, stainless steel and self-lubricating polymer roller options for a wide variety of applications. With sealed rollers and precision machined hard anodized carriage bodies, this linear guide system is corrosion resistant and can function in extremely dirty environments. Optional polymer coated rollers provide super quiet operation while lubed-for-life sealed rollers offer
